

# **Eastern European Container Energy Storage Station BESS**

## Overview

---

What does Bess stand for?

Solarpro, a leading technological provider of solutions for the generation and storage of energy in Europe, has successfully deployed the largest battery energy storage system (BESS) project in Eastern Europe, with a capacity of 55MWh.

What are battery energy storage systems (Bess)?

Battery energy storage systems (BESS) developments are becoming increasingly commonplace in Europe as countries need to store their renewable energy. According to BloombergNEF, Europe is on track to exceed 300 GWh of storage capacity by 2030.

How many MWh can a Bess system store?

This system, designed as a 2-split containerized BESS solution, can be stacked to deliver a cumulative energy storage capacity of up to 9 MWh, according to Spinnen. A company statement on its official website highlights that the system is equipped with CATL's high-energy-density cells featuring up to 5 years of zero degradation.

How tall is a Bess system?

With an overhead louver, this stacked BESS system has a height of 4.7 meters and a 2-meter head width. Enhancing the BESS system's compatibility and system efficiency, it supports both centralized and string Power Conversion System (PCS), targeting Europe's application scenario, utility-scale PV + storage projects. Transportation

## Eastern European Container Energy Storage Station BESS
