

# Effects of industrial and commercial energy storage batteries in Antwerp Belgium

## Overview

---

Why is battery production important for the EU?

Batteries, widely used in the transport and energy sectors, are central to the global energy system. They will be key to the EU's clean energy transition, industrial future and strategic autonomy. Boosting the industrial base for battery production is therefore a key task for the EU.

Is totalenergies developing a second battery storage project in Belgium?

Download the Press Release (PDF) Antwerp, April 3, 2024 – On the occasion of Belgian Energy Minister Tinne Van der Straeten's visit to TotalEnergies' Antwerp refinery battery storage project, the Company announced the development in Belgium of a second similar project. The new project will be developed on the site of TotalEnergies' depot in Feluy.

Is Belgium a good place to invest in battery storage?

Belgium is one of the most active and mature grid-scale energy storage markets in Europe, with diversified opportunities for monetising battery storage via flexibility markets and a supportive regulatory regime.

What are the challenges faced by battery production companies in Europe?

Mastering the complexities of battery production technologies remains another major challenge. Delays or cancellations of gigafactory projects have already been announced across Europe. High degree of business uncertainty and lack of trust in new technologies cripple producers who bring novel products to the market.
