

Egypt solar Panel Rooftop BESS Cooperation

Overview

What is Scatec - Egypt's first hybrid solar & battery project?

This project marks a significant milestone as it represents the country's first hybrid solar and battery initiative. With an investment of approximately USD 590 million, Scatec aims to boost Egypt's renewable energy capacity, contributing to the nation's sustainability goals.

What is the obelisk solar and battery storage project?

The project is set to unfold in two phases, with the first phase targeting completion by mid-2026. The Obelisk solar and battery storage project will be developed in two distinct phases. The initial phase encompasses the installation of a 561 MW solar plant alongside a BESS capable of storing 100 MW/200 MWh of electricity.

How can solar power and battery storage improve grid stability?

The combination of solar power generation and battery storage presents numerous advantages for energy management and reliability. By integrating these technologies, Scatec is set to enhance grid stability while addressing fluctuations associated with variable renewable resources like solar energy.
