

# **Electric container recommendation**

## Overview

---

Are electric ships better than electric ships for containers?

The results show that electric ships have significant advantages in environmental protection, energy saving and lower costs while electric ships for containers have great prospects for future development. This paper provides a useful exploration for the international shipping industry to adopt effective measures to control ship emissions. 1.

Should you ship electric vehicles in containers?

As demand for Electric Vehicles (EVs) rises, shipping them in containers requires careful risk assessment due to the hazards of Lithium-Ion batteries. Additional safety measures, including inspections, stowage protocols, and crew training, are recommended to mitigate risks like thermal runaway and fire.

What is the world's first electric container ship?

The world's first 700TEU electric container carries an intelligent ship system consisting of integration platform, navigation, cabin and energy efficiency. It is the world's first electric container ship in terms of overall length, width, number of boxes, dwt and battery capacity.

How many 700teu Electric Container ships are there?

On December 28, two 700TEU electric container ships N997 and N998 built by CHI (Yangzhou) for COSCO Shipping Development were successfully named . The world's first 700TEU electric container carries an intelligent ship system consisting of integration platform, navigation, cabin and energy efficiency.
