## Overview

---

What is a 5MWh liquid-cooling energy storage system?

The 5MWh liquid-cooling energy storage system comprises cells, BMS, a 20'GP container, thermal management system, firefighting system, bus unit, power distribution unit, wiring harness, and more. And, the container offers a protective capability and serves as a transportable workspace for equipment operation.

What is CATL 5MWh enerD?

On August 23, the CATL 5MWh EnerD series liquid-cooled energy storage prefabricated cabin system took the lead in successfully realizing the worlds first mass production delivery. As the worlds leading provider of energy storage solutions.

Why is CATL a leader in liquid cooled energy storage?

As the world's leading provider of energy storage solutions, CATL took the lead in innovatively developing a 1500V liquid-cooled energy storage system in 2020, and then continued to enrich its experience in liquid-cooled energy storage applications through iterative upgrades of technological innovation.

What is a container energy storage system?

Containerized energy storage systems play an important role in the transmission, distribution and utilization of energy such as thermal, wind and solar power [3, 4]. Lithium batteries are widely used in container energy storage systems because of their high energy density, long service life and large output power [5, 6].
