How much does a commercial battery energy storage system cost?

**Average Installed Cost per kWh in 2025** In today's market, the installed cost of a commercial lithium battery energy storage system — including the battery pack, Battery Management System (BMS), Power Conversion System (PCS), and installation — typically ranges from: \$280 to \$580 per kWh for small to medium-sized commercial projects.

How much does the energy storage system cost?

The energy storage system is a 4MW, 32MWh NaS battery consisting of 80 modules, each weighing 3 600 kg. The total cost of the battery system was USD 25 million and included USD 10 million for construction of the building to house the batteries (built by Burns & McDonnell) and the new substation at Alamito Creek.

Should you invest in a commercial battery energy storage system in 2025?

In 2025, investing in a high-quality ESS is not only affordable but essential for energy-forward businesses. Contact GSL Energy today to find the right storage solution for your business. Discover the true cost of commercial battery energy storage systems (ESS) in 2025.

How much does a battery project cost?

Developer premiums and development expenses - depending on the project's attractiveness, these can range from £50k/MW to £100k/MW. Financing and transaction costs - at current interest rates, these can be around 20% of total project costs. 68% of battery project costs range between £400k/MW and £700k/MW.
