Overview

Is solar energy on the verge of a major expansion in Russia?

Solar energy in Russia might be on the verge of a major expansion thanks to a government support program for renewable energy sources, industry experts told The Moscow Times.

Does Russia have sufficient solar energy?

Despite the common misconception, Russia has more than enough insolation to produce solar energy. Moscow-based renewables company Unigreen Energy, which has received a government guarantee for its solar power contributions, confirms this.

Do solar and wind power plants produce electricity in Russia?

The volumes of electrical energy produced in the Russia by solar and wind power plants, as well as their current and prospective role in the energy balances of Russian regions are analyzed.

What does Unigreen Energy say about Russia's insolation?

Unigreen Energy said Russia has more than enough insolation — solar radiation hitting an object — to produce solar energy. There is no sun there! Well, our data tells us differently.”
