

Factory price battery storage in Melbourne

Overview

How much do solar batteries cost in Australia?

As of May 2025, the average price of solar batteries in Australia ranges from \$900 to \$2,000 per kilowatt-hour (kWh) of storage. A 10kWh system typically costs a little over \$10,000, while a larger 16kWh system may approach \$16,000, depending on the brand, performance, and installation factors. Here's a breakdown of average prices.

Who is Battery Works Australia?

Battery Works Australia specializes in battery storage solutions, having transitioned from a battery re-packing business to becoming a leading distributor of battery systems, including Victron Energy products. Their expertise and national distribution capability ensure enhanced system design and technical support for various battery applications.

Are batteries worth it in Australia?

We've been tracking the financial return of batteries in Australia for over a decade and regularly update our analysis of whether batteries are worth it. At the midway point of 2025 was a key turning point in this equation as the federal battery rebate was introduced which offers a discount of around 30% for a typical 10kWh battery.

Will Australia's first battery storage system be operational by 2026?

EnergyAustralia is actively developing Australia's first four-hour utility-scale battery storage system with a capacity of 350 MW, set to be operational by 2026 in Victoria's Latrobe Valley. This project highlights the company's commitment to renewable energy and innovative energy solutions.
