Who is Rs circuit breaker?

RS is your reliable partner for all your circuit breaker needs. We are a leading circuit breaker supplier and manufacturer, offering a wide selection of high-quality electrical circuit breakers from trusted brands.

What are the different types of circuit breakers?

Circuit breakers come in various types, each designed to protect against specific electrical faults, ensuring the safety of both people and equipment. RCBO Breakers: RCBO stands for Residual Current Circuit Breaker with Over Current protection.

How do I choose a circuit breaker?

Application: Choose the appropriate circuit breaker type for your application. For instance, use an RCCB for protection against earth leakage and electric shock, an MCB for general overcurrent protection, or an MCCB for high-current industrial applications.

What if a breaker has a bad voltage rating?

Using a breaker with an inadequate voltage rating can lead to catastrophic failure and pose a safety hazard. Number of Poles: The number of poles determines the number of conductors the breaker can protect. Single-pole breakers are used for single-phase circuits, while two-pole and three-pole breakers are employed in multi-phase systems.
