

Finland home solar lights

Overview

Is solar power a real thing in Finland?

Many Finns are already familiar with solar power: solar panels can be found on the roofs of many homes, summer cottages and workplaces. As technology develops, industrial-scale solar power production is also becoming more common in Finland. Finland is undergoing a major energy transition.

Why is Finland a good place to install solar panels?

"Finland's advantage is its low atmospheric temperature, which improves the efficiency of solar photovoltaic cells. The colder it gets, the better the solar panels work. Solar panels can also withstand snow loads if they are installed following directions.

Why is industrial-scale solar power production becoming more common in Finland?

As technology develops, industrial-scale solar power production is also becoming more common in Finland. Finland is undergoing a major energy transition. Moving away from imported fossil fuels and towards local, clean energy production will create the basis for new industrial investment.

Does Finland need wind power?

In addition to wind power, we also need plenty of solar energy, for which Finland has excellent prospects. Solar power is particularly well suited as a counterpart to wind power. These two emission-free energy sources complement each other: solar energy is available in summer and during the day, while the highest winds occur on average in winter.

Finland home solar lights

About solar power in Finland
