

Fire protection solution for energy storage station in Porto Portugal

Overview

As its name implies – "aspirated" smoke and off-gas detection systems use an "aspirator" mounted in a detector unit. The detector connects to a sample pipe network mounted within the area or object being.

Are lithium-ion battery energy storage systems fire safe?

With the advantages of high energy density, short response time and low economic cost, utility-scale lithium-ion battery energy storage systems are built and installed around the world. However, due to the thermal runaway characteristics of lithium-ion batteries, much more attention is attracted to the fire safety of battery energy storage systems.

How to protect battery energy storage stations from fire?

High-quality fire extinguishing agents and effective fire extinguishing strategies are the main means and necessary measures to suppress disasters in the design of battery energy storage stations . Traditional fire extinguishing methods include isolation, asphyxiation, cooling, and chemical suppression .

Which companies have a fire protection system in Hong Kong?
