

Germany Hamburg solar Tile Company

Overview

What is a solar roof tile?

The solar roof tile – for a modern roof that protects, generates electricity and impresses with its simple elegance. Meyer Burger Tile combines high-quality aesthetics with innovative solar energy. Invisibly integrated, the technology remains concealed while the roof shines in perfect beauty.

What is solar plain tile?

The Solar Plain Tile developed by paXos offers the aesthetics of a modern roof shingle, but in combination with the use of PV and solar thermal energy. Due to the small product dimensions, roof surfaces can be individually and partially covered - even entire roofs are possible. Double roofing is not necessary at all.

Who funded the Solar Roof Tile Project?

This project was funded by the European Regional Development Fund (ERDF). As part of the above-mentioned ERDF-funded research project in cooperation with the TH Cologne, the solar roof tile was further developed and optimized so that it can be mass-produced and used like a conventional roof tile.

What is a high-performance solar roof tile?

The feather-light, high-performance solar roof tile with its elegant design can be combined with numerous roof tiles from different manufacturers, allowing it to be laid in rows or offset. Energy that fits in the roof. Why mount solar modules on high-quality roof tiles when the solar cells can be integrated directly into the tile?
