

# Helsinki Solar PV Inverter

## Overview

---

How to optimize solar generation in Helsinki Finland?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in Helsinki, Finland as follows: In Summer, set the angle of your panels to 43° facing South. In Autumn, tilt panels to 61° facing South for maximum generation.

How many solar PV locations are there in Finland?

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 49 locations across Finland. This analysis provides insights into each city/location's potential for harnessing solar energy through PV installations. Link: [Solar PV potential in Finland by location](#).

Where is solar energy produced in Finland?

In Helsinki, Uusimaa, Finland (latitude: 60.1719, longitude: 24.9347), solar energy production varies significantly across different seasons. During the summer months, an average of 5.72 kWh per day per kW of installed solar can be generated, making it a suitable time for harnessing solar power.

Where is the best place to install solar panels in Finland?

To the south, there are more hilly areas around Espoo and Kauniainen. The most suitable area for large-scale solar PV installations would be any flat land near Helsinki that has good access to sunlight throughout the year. This could include fields or open spaces near Sipoo, Vantaa, Espoo or Kauniainen.
