

High-efficiency Montevideo folding container for oil platforms

Overview

Faced with extreme environments and challenges, DNV 2.7-1 Offshore Container is tailored for offshore oil and gas drilling platforms with its excellent performance and strict safety standards, becoming a bridge connecting deep-sea energy and land needs. Where can a container be used?

Containers are used on oil rigs, wind farms, and emergency stations for both short and long-term deployment. Options include flexible living cabins and workshop-living hybrids that boost on-site efficiency. MGS Offshore offers DNV-compliant, plug-and-play accommodation solutions tailored to offshore challenges.

What are offshore housing containers?

Offshore housing containers are specialised, modular structures engineered to provide workers in isolated offshore locations, like oil rigs and marine vessels safe and livable quarters. Depending on operational requirements, these containers can be deployed temporarily or permanently.

Why do oil rigs need accommodation container facilities?

In this regard, accommodation containers offshore facilities provide several benefits, such as: Quick deployment to remote locations: Accommodation container facilities can be rapidly transported and installed on oil rigs. Thereby, ensuring minimal downtime for crews in isolated areas.

Why do offshore oil rigs need a workshop container?

On offshore oil rigs, proximity between living spaces and workstations appreciably enhances operational efficiency and safety. Offshore workshop containers are specialised units that blend living and working spaces. They are ideal for technicians and engineers who need quick access to housing and their working environment on offshore rigs.
