

# **High-power floating solar water pump**

## Overview

---

What is a solar powered water pump?

A solar powered water pump is an eco-friendly, off-grid solution that uses solar energy to move water from wells, rivers, ponds, or tanks—without needing electricity or fuel. Perfect for farms, homes, and remote areas, these pumps are powered by photovoltaic panels and come in both surface and submersible options.

Can a floating pump be used with a solar panel?

Floating pumps can be used with any combination of solar panels supporting up to 46.8 Gal/Min or 590 cow/calf pairs, depending on the height of the lift with the water consumption based on 25 Gal/Cow-Calf/Day. No check valve allows water in the line to flow back through pump, allowing longer use in spring and fall.

Are solar-powered water pumps eco-friendly?

Whether you are looking for the most environmentally friendly pumping solution on the market or want to give your garden a plus of beauty and elegance, a solar-powered water pump is what you should look for. It's 100% green, efficient and cheap! Each pump comes with its solar panel, and it's straightforward to install and use.

How to choose a solar-powered water pump?

When choosing a solar-powered water pump, you need to take into account several key factors to guarantee it meets your needs. Think about the flow rate, power efficiency, and how durable the pump is. Don't forget to factor in installation ease and maintenance requirements to make your experience hassle-free.
