

# How big is a solar panel in Kyrgyzstan

## Overview

---

Why is China building a 100 MW solar power plant in Kyrgyzstan?

Kemin, Kyrgyzstan — In a significant step toward enhancing Kyrgyzstan's energy infrastructure, China has begun construction of a 100 MW solar power plant in the city of Kemin, located in the Chuy Region. The project underscores Kyrgyzstan's commitment to sustainable energy development and environmental preservation.

What is Kyrgyzstan's solar project?

The project underscores Kyrgyzstan's commitment to sustainable energy development and environmental preservation. The solar plant, once operational, is expected to generate 155 million kWh of electricity annually, contributing to the country's energy needs while reducing reliance on fossil fuels.

What is the total area of Kyrgyzstan?

Total area is the sum of land and water areas within international boundaries and coastlines of Kyrgyzstan. The total area of Kyrgyzstan is 199,950 km<sup>2</sup> (77,201 mi<sup>2</sup>) according to the United Nations Statistics Division . Source: Pew Research Center. The Global Religious Landscape .
