

How long does it take for an solar container outdoor power to pay back

Overview

How long does it take a solar system to pay off?

The average solar payback period for EnergySage customers is currently just over seven years. However, without the federal tax credit, that same system would take over 10 years to pay for itself. Here's what you need to know about how long it's likely to take you to break even on your solar energy investment—and why timing matters.

How long does solar payback last?

Payback periods vary significantly by state, depending on the availability of incentives, the cost of solar, and the cost of electricity. Remember: Solar payback periods will extend 43% longer—or up to 8 years—starting January 1, 2026, when the federal solar tax credit disappears.

Do you need a payback period for solar?

With a solar loan or a lease or PPA, you often don't need to provide any cash upfront. While you'll save less money in the long run by paying for solar with a loan or lease, assuming your monthly solar payments are less than what you currently pay for electricity, you won't have a payback period.

How long do solar panels last?

At the end of those 7.1 years, your solar panels will have saved you enough money on your electric bill to cover the upfront cost of your system. Year eight in the example is when you technically start saving money, having finally broken even on your investment.
