

# **How long is the warranty period for energy storage batteries in Krakow Poland**

## Overview

---

**Equipment warranty** The term of guarantee of normal operation of the storage system and free service is one year from date of purchase. Does a battery storage system need a warranty?

A battery storage system is a decades-long investment that a warranty can help protect. The less power your system stores, the more your home may need to draw from the utility company, which eats into your savings. A good warranty ensures that if your battery experiences a problem, that it will be replaced and your investment will be protected.

What is a home battery warranty?

The home battery product warranty provides coverage if the device shows real defects: in other words, if the battery simply stops working. Most batteries have a product warranty period of 10 years. This means that if anything breaks in the battery in the 10 years from the time of installation, you can seek redress from the manufacturer.

How long does a battery warranty last?

A standard battery warranty should come with at least 10 years of protection, though it can be shorter depending on how often you charge and drain your battery. Battery warranties typically won't reimburse for labor costs associated with installing new equipment or shipping fees for new equipment.

What is a solar battery warranty?

Solar battery warranties vary by manufacturer and product. A standard battery warranty should come with at least 10 years of protection, though it can be shorter depending on how often you charge and drain your battery.
