

# How many generators are there in the Paraguayan power station

## Overview

---

How many generators are there in Paraguay?

Ten of the generators are generating electricity for the Paraguayan side at 50 Hz and the other ten for the Brazilian at 60 Hz. Explore Amazon villages, fish for piranha, and cool off in lagoon-covered sand dunes. As one of the world's largest hydroelectric dams this plant took two countries to get built.

How much electricity does Paraguay produce?

In 2013, the plant produced a record setting, 98.6 TWh getting produced, supplying Paraguay with 75% of its electricity used and Brazil 17%. Ten of the generators are generating electricity for the Paraguayan side at 50 Hz and the other ten for the Brazilian at 60 Hz.

Is biomass a source of electricity in Paraguay?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. Paraguay: How much of the country's electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.

Why is Paraguay a leader in sustainable electricity generation?

This clean electricity achievement places Paraguay among the leaders in sustainable electricity generation globally. Beyond its borders, Paraguay significantly contributes to lowering regional emissions as a key net exporter of electricity, helping neighboring regions to reduce their reliance on fossil fuels.
