How much does a BMS cost?

Prices increase with higher voltage, amp capacities, and parallel/series configurations. Battery Voltage – BMS pricing often correlates to common battery voltages used. For example, basic 12V BMS price for small power banks average \$30-\$200, while 24V BMS price for golf carts or marine run \$100-\$500. High voltage BMS for EVs starts around \$1000.

How many BMSs does a battery have?

Each battery comes with its own BMS. In parallel, you have three independent batteries and each has its own BMS.

How much does a battery storage system cost?

The cost of the BMS can account for about 5% to 10% of the total battery storage system cost. For a 2MW system, if we assume a BMS cost ratio of 8%, and the total system cost excluding the BMS is \$800,000 (as calculated for the battery cost above), then the cost of the BMS would be $\$800,000 * 0.08 = \$64,000$.
