

# How to make a power strip site with battery cabinet

## Overview

---

What is a DIY power station?

A DIY power station is a portable battery system that stores and delivers electricity. Unlike pre-made units, you choose the components to match your needs. Think of it like building a Lego set: you pick the battery size, outlets, and charging methods (solar, wall, car) to create a system that powers phones, laptops, lights, or even appliances.

What battery does my DIY power station use?

My DIY power station has 1,464 watt hours of energy using a 122 amp hour flooded lead-acid battery from Wal-Mart. This battery is no longer available, however you will find alternative 100 amp hour AGM and LiFePO4 batteries linked below.

How much does a DIY power station cost?

However, store-bought models can cost \$500 to \$3,000+ and more. Building your own DIY power station saves money, lets you customize capacity and features, and teaches valuable skills. In this guide, we'll break down everything you need to know, even if you've never touched a soldering iron.

### What Is a DIY Power Station?

.

How do you connect a power strip to a door?

Add the power strip inside the cabinet and route the wire out through the side hole. Add each of the chargers to the door and route the wires inside. Plug in each of the wires into the power strip and tie up any extra wire using velcro cord organizers.
