

# Huawei Energy Storage Charging Pile Investor

## Overview

---

How many Huawei Supercharge charging piles will be installed in China?

(Yicai) Dec. 8 -- Huawei Technologies will join hands with its clients and business partners to install over 100,000 Huawei SuperCharge charging piles along major roads in China next year. The project will touch more than 340 Chinese cities, Hou Jinlong, president of Huawei Digital Power Technology, said during an industry forum yesterday.

What is Huawei Supercharge?

Founded in 2021, the unit of the Shenzhen-based telecoms giant focuses on clean energy generation, data centers, and electric mobility. Huawei launched the SuperCharge platform this year to enable a range of more than 200 kilometers after just five minutes of charging.

Does Huawei have a sulfide battery?

Huawei has intensified its ambitions in advanced energy storage by patenting a sulfide-based solid-state battery capable of achieving driving ranges of up to 3,000 kilometres and ultra-fast charging in just five minutes.

Does Huawei have a 3,000-kilometre range and 5-minute charging capacity?

While Huawei's assertions of a 3,000-kilometre range and five-minute charging have attracted significant attention, experts caution that such figures remain theoretical and would necessitate charging infrastructure that is currently not commercially available.
