

Huawei Indonesia Battery Energy Storage Project

Overview

Does Indonesia need battery storage?

Indonesia aims to convert 250MW of diesel-generated power to renewable energy this year and will need battery storage to do this successfully. Image: PLN. Indonesia's state-owned utility and battery producer have launched a 5MW battery energy storage system (BESS) pilot project as it seeks to move away from diesel-generated power.

Will Indonesia build a battery energy storage system by 2022?

The agreement was made with other state-owned bodies, such as the Indonesian Battery Corporation, to build the Battery Energy Storage System by 2022. However, no information has yet been revealed about the Battery Energy Storage System's location or specific functions.

What is Huawei doing at Solartech Indonesia 2022?

Huawei, together with its channel partner JJ LAPP, showcased innovations in the energy storage system (ESS) and smart string inverters at Solartech Indonesia 2022. Huawei is honored to contribute to Indonesia's low carbon development with its field-proven Smart PV solutions.

How does Huawei contribute to Indonesia's low carbon development?

Huawei is honored to contribute to Indonesia's low carbon development with its field-proven Smart PV solutions. Leveraging power electronics and digital technologies, Huawei makes efforts to build a new power system based on renewable energy sources to drive the energy transformation.
