

Huawei three-phase energy storage inverter

Overview

What is Huawei MB0 hybrid inverter?

Huawei expands the portfolio of three-phase hybrid inverters and combines the 3 – 10 KTL M1 solutions with an innovative product ideal for C&I systems: the MB0 inverter. The available sizes range goes from 12 to 25 KTL, giving the opportunity to install hybrid systems for medium-sized commercial projects, a continuously expanding segment.

Are Huawei inverters battery-ready?

Yes, all Huawei residential inverters (SUN2000-L1 and M1 series) are battery-ready and support plug-and-play integration with LUNA2000 battery systems. You can add batteries years after the initial installation without requiring additional hardware or inverter replacement.

Which battery module is suitable for a Huawei inverter?

The Huawei storage system has 5kWh LUNA2000 battery modules, it is suitable for both single-phase and three-phase inverters and is characterized by an elegant and modular design. LUNA batteries are guaranteed for 10 years and have an IP65 protection rating, furthermore it can be installed on the floor or on the wall (optional).

What are the benefits of a three-phase inverter?

Thanks to the three-phase unbalance, the inverter is able to provide a stable power supply for various devices without relying on the grid. Optimization of power allocation improves energy utilization efficiency. The storage expansion option allows surplus energy to be stored if required and used at night or during power outages.
