

Ihs solar inverter

Overview

What is the PV inverter intelligence service?

For prompt responses to urgent and unique questions. The PV Inverter Intelligence Service provides comprehensive research on the global PV inverter market in one single subscription package, delivering detailed and accurate data and insights into the market for traditional inverters, as well as microinverters and power optimizers.

Should PV inverters be distributed?

With Chinese telecom's giant, Huawei, leading the charge - the benefits of a more distributed approach to PV inverters have been heavily marketed and EPCs around the world have begun to favor the approach over large central inverters. IHS Markit estimates that nearly 25 GW of string inverters were shipped to utility-scale PV installations in 2017.

Will a 1500V inverter be a big deal in 2020?

In fact, IHS Markit predicts that outside of China (which has been relatively slow to adopt the technology in comparison to international markets), 1500V products will account for 84% of high power PV inverter shipments in 2020, in comparison to just 11% four years previously. What are the challenges?

.

How many GW of string inverters were shipped in 2017?

IHS Markit estimates that nearly 25 GW of string inverters were shipped to utility-scale PV installations in 2017. Naturally, with string inverter suppliers now aggressively targeting the large-scale PV sector, they are now increasingly releasing 1500V products in order to capitalize on this growing trend.
