

# India container battery energy storage project

## Overview

---

Which is the largest battery energy storage system in India?

Adani Group will deploy a 1,126 MW/3,530 MWh battery energy storage system (BESS) at Khavda, the world's largest renewable energy plant. This project, entailing deployment of more than 700 BESS containers, will be the largest BESS installation in India and one of the world's largest single-location BESS deployments.

How much battery energy storage capacity is available in India?

Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications. However, only about 219MWh of BESS capacity is reported to be operational, leaving a large pipeline of projects under construction.

Should India invest in battery storage?

The report concludes that as India's electricity system evolves to integrate more variable renewable energy, the case for investing in battery storage becomes stronger. "Energy transition, and the ensuing higher share of variable renewables in the energy mix, is driving extreme intra-day price swings and shortage of ancillary services at the grid.

How many mw can a battery energy storage system deliver?

Image: Adani Green Energy Ltd Adani Group has forayed the battery energy storage systems (BESS) sector with a 1,126 MW / 3,530 MWh project. The system can deliver 1,126 MW of power for about three hours, storing a total of 3,530 MWh of energy.

## India container battery energy storage project
