

Industrial Uninterruptible Power Supply Selection

Overview

What is an industrial uninterruptible power supply system?

Industrial uninterruptible power supply systems (UPS Systems) include core technologies to cover industrial equipment. Our systems offer applications ranging from a few hundred watts to massive Multi-Mega Watt Parallel UPS installs inclusive of voltage regulations, voltage correction, sag correction, surge suppression and harmonic mitigation.

What are Uninterruptible Power Supplies (UPS)?

Uninterruptible power supplies (UPS) are devices that allow machines to keep their field power supplies, programmable logic controllers (PLCs), and communications devices functioning during an unexpected outage. They offer a means of achieving this.

How do I choose an uninterruptible power supply?

To select the right uninterruptible power supply (UPS), calculate the average power required for all connected appliances. For instance, a 350-500 VA capacity is suitable for an LCD monitor or a regular PC.

Industrial Uninterruptible Power Supply Selection

Industrial UPS , Uninterrupted Power Supply

An uninterruptible power supply (UPS) provides a source of power for the equipment it protects. If there is a disruption to power, the UPS has an on-board battery to automatically supply to ...

Guidance on the Selection and Installation of Industrial
