

Inside story of solar panels installed on roof

Overview

Should you install solar panels on your roof?

With the increasing emphasis on renewable energy, more homeowners are opting to install solar panels on their roofs. Understanding how solar panels are installed on roof can help you make an informed decision and prepare for the installation process.

How does a rooftop solar system work?

Once permits are in place, the actual Rooftop Solar Installation begins. Mounting structures are fixed to the roof, solar panels are installed, and all components are connected. Wiring is done carefully, ensuring safety and reliability, and then the system is connected to your home's electrical panel.

How do in-roof solar panels work?

Just like traditional solar panels, in-roof versions use photovoltaic cells to turn sunlight into electricity. The big plus?

They integrate smoothly into your roof during construction or when you're replacing an old roof, avoiding the visual clutter of typical installations.

Are in-roof solar panels right for Your House?

They integrate smoothly into your roof during construction or when you're replacing an old roof, avoiding the visual clutter of typical installations. Blending seamlessly with your roofline, in-roof solar panels can be a game-changer for your home. Here's why:
