

# Installation Solution for a 15kW Smart Photovoltaic Energy Storage Container

## Overview

---

What is a 3MWh solar energy storage system?

PVMARS's 3MWh energy storage system (ESS) + 1.5MW solar energy is an off-grid microgrid solution. Solar panels themselves cannot store a lot of electricity, so the system uses photovoltaic panels to generate electricity during the day. It delivers power to your electrical equipment through the PCS and enables the ESS to store excess solar power.

What is a solar capacity extension?

GoodWe provides a solar capacity extension solution, which integrates both hybrid and retrofit functions into a single system, allowing adaption to higher power consumption patterns in both single and three phase systems.

How can pvmars provide a complete energy storage system solution?

The premise of providing a complete energy storage system solution requires: You only need to submit load (electrical equipment) information, pictures/drawings of the installation location, output voltage range, and other data. PVMARS's engineering team can provide a complete solar energy storage system (off-grid or mini-grid solution).

How much does a 3MWh energy storage system cost?

Flexible, Scalable Design For Efficient 3000kWh 3MWh Energy Storage System. With 1.5MW Off Grid Solar Kits For A Factory, City, or Town. EXW Price: US \$0.18-0.6 / Wh. What is a Turnkey Package of 3MWh Energy Storage System+1.5MW Solar Panels?

A complete 3MWh energy storage system + 1.5MW solar turnkey solution includes the following configurations:
