How much does a solar inverter cost?

The inverter is a crucial part of your solar investment, whether you're on the grid or building an off-grid solar system. It connects your solar photovoltaic panels to your home and the grid, determining whether your energy is usable, storable, or wasted. Expect to pay \$1,000 to \$3,500, depending on type, size, and features.

How much does a microinverter cost?

While they cost more than string inverters, averaging \$1.15 per watt, they offer the benefit of independent panel optimization. For a 5 kW system, the cost is approximately \$5,750. Microinverters generally come with warranties of around 25 years, which aligns with the expected lifespan of the solar panels themselves.

How much does a high power hybrid inverter cost?

High-power hybrid inverters (10KW and above): the price range can exceed thousands of dollars and even reach tens of thousands of dollars. These inverters are typically used for large-scale PV power systems, industrial power or locations that require a highly reliable power supply.

How much does an off-grid inverter cost?

Small power off-grid inverters (500W-2KW): the price range is around tens to hundreds of dollars. These inverters are typically used in scenarios such as home emergency power, outdoor adventures or small solar power systems.  
Medium power off-grid inverters (3KW-10KW): the price range is around hundreds to thousands of dollars.
