

Irish power generation equipment container

Overview

Is the Irish power generation market receptive to US technology?

The \$2.6 billion Irish market for electrical power generation equipment is very receptive to U.S. technology. In the face of strong international competition, U.S. companies have achieved success in supplying technology, equipment, and systems to Irish power generation operators.

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

Is the Irish electricity market liberalized?

The Irish electricity market is fully liberalized in line with the European Union (EU) energy framework. The \$2.6 billion Irish market for electrical power generation equipment is very receptive to U.S. technology.

What is a twin power container?

The Twin Power container solution is a container that combines two engine/alternator assemblies with/ without CHP in a 40ft container, making it perfect for applications that require variable or continuous power. Because you have two generators on a single platform, you have the flexibility you need to meet a 100% load or even a smaller load.

Irish power generation equipment container

Ireland container emergency power generation equipment

Why are there emergency power plants in Ireland? The emergency power plants are part of an overall CRU programme to boost electricity generation and to stabilise the Irish power supply ...
