

Italian energy storage container system

Overview

Does Italy have a new battery energy storage system?

Italy has taken a major step forward in its energy transition efforts, giving the green light to 361 MW of new battery energy storage systems (BESS) spread across three regions—Lazio, Puglia, and Sardinia.

How is Italy transforming its energy system?

Italy, like much of Europe, is undergoing a rapid transformation in how it generates and distributes energy. With solar PV and wind power ramping up quickly, grid operators are increasingly reliant on energy storage systems to manage variability and avoid curtailment of renewable energy during periods of oversupply.

What is Enel doing in Italy?

Enel is leading this revolution with advanced projects both nationally and internationally, thereby contributing to Grid stabilization and decarbonization. Since the 1980s, Italy has shown a constant propensity to innovate in the field of "classic" renewables, with the use of hydropower and pumped storage systems.

What is Italy's national energy and Climate Plan?

Italy's national energy and climate plan (PNIEC) outlines ambitious targets for decarbonization and aims to reach around 70 GW of solar and 18 GW of wind capacity by 2030. Realizing this vision will require a parallel surge in C&I ESS and utility-scale storage to ensure energy security, grid stability, and affordability.
