

# **Italian new energy battery cabinet base station power generation store**

## Overview

---

Does Italy have a new battery energy storage system?

Italy has taken a major step forward in its energy transition efforts, giving the green light to 361 MW of new battery energy storage systems (BESS) spread across three regions—Lazio, Puglia, and Sardinia.

How many energy storage systems were installed in Italy last year?

The industrial group's report said 209,112 energy storage systems were installed in Italy last year, with total rated power of 2,113 MW and storage capacity of 5,921 MWh. That took the nation to 733,666 systems, at the end of the year, with 5,565 MW total rated power and 12,942 MWh of storage.

What percentage of Italy's energy storage systems are lithium based?

Lithium-based batteries account for 99.6% of the energy storage systems installed in Italy at the end of 2024. Some 92% of the nation's batteries had less than 20 kWh of storage capacity. Among those, 37% were 10 kWh to 15 kWh in scale and 36% 5 kWh to 10 kWh.

What will Italy get from a battery storage tender?

Winning participants of the tender will receive fixed revenues over a 15-year contract for capacity made available to the grid. Italy broke new ground in energy storage with its very first battery storage auction, competitively awarding the full 10 gigawatt hours (GWh) of capacity put up for tender.
