

Ivory Coast RV solar container lithium battery pack

Overview

Are lithium batteries good for RV solar applications?

A great example is the evolution of lithium batteries for RV solar applications. Lithium batteries have several apparent advantages (we'll get into those), but the price has always been the hurdle. Lithium batteries cost more — a lot more — than their traditional lead-acid counterparts.

Are lithium batteries a game-changer for RV solar applications?

When those challenges are overcome, however, these new solutions often become game-changers for RV owners. A great example is the evolution of lithium batteries for RV solar applications. Lithium batteries have several apparent advantages (we'll get into those), but the price has always been the hurdle.

How long do RV batteries last?

Looking at the long-term cost of ownership, however, paints a different picture. Lead-acid batteries have an average lifespan of three years versus ten years for lithium. That means that an RV owner may have to replace their traditional lead-acid batteries three times, while the lithium equivalent may still be functional.
