

Kabul base station room uninterrupted power supply project

Overview

How many power supply combinations are there in a base station?

For base stations, there are six power supply combinations-solar-only, solar+diesel, solar+mains, etc. Solar-only When there is sufficient sunlight, photovoltaic cells convert solar energy into electric power. Loads are powered by solar energy controllers, which also charge the batteries.

Can a remote base station power supply be uninterrupted?

By Zhang Hongguan & Zhang Yufeng Uninterrupted power supply for remote base stations has been a challenge since the founding of the wireless industry, but alternative sources have a chance of succeeding where traditional solutions have failed.

What happens if a base station doesn't get enough sunlight?

When sunlight is not sufficient, the batteries will take over. Considering that remote base stations must be highly-integrated, inexpensive, and modest, Huawei has developed its all-on-pole EasySite solution, which integrates the base station, antennas, transmission, and tower into one convenient package.
