

Kazakhstan energy storage vehicle equipment

Overview

What is Kazakhstan's new energy EV & charging pile industry?

Although Kazakhstan's new energy EV and charging pile industry started not long ago, it has formed a diversified product and technology structure, laying a solid foundation for future development. With the advancement of technology and market expansion, it is expected that these market segments will further develop and mature.

How many new energy EVs are sold in Kazakhstan?

First of all, in terms of industry scale, although the sales of new energy EVs in Kazakhstan do not account for a high proportion of the total sales of automobiles, the growth rate is rapid. 2023, the number of new energy EVs sold was 815, of which 615 pure electric vehicles were sold, accounting for 75.5% of the sales of new energy EVs.

Are EVs a big market in Kazakhstan?

Nonetheless, EVs still account for less than 0.02% of the country's total vehicle fleet, indicating a huge market potential. In terms of charging infrastructure, Kazakhstan currently has a limited number of charging stations, concentrated in the two main cities of Almaty and Nursultan.

How can Kazakhstan improve its technology and market competitiveness?

For example, Kazakhstan's Ministry of Industry and Infrastructure Development and China's Jianghuai Automobile Group have signed a cooperation agreement aimed at promoting cooperation in the field of new energy vehicles and charging piles, which will help to enhance Kazakhstan's technological level and market competitiveness in this field.
