

Kuala Lumpur Solar Fan Direct Sales

Overview

How much does a fan cost in Malaysia?

Depending on where you're shopping, you're looking at an SRP of around RM149.00 - RM154.00, which is cheaper than some of the leading and veteran brands in the industry. What makes this price point more impressive, is when you consider the overall quality of the fan itself, from the craftsmanship to the design and so on.

What is a solar attic fan?

Solar attic fans offer a clean, renewable energy solution by harnessing the abundant power of the sun, while regular attic fans rely on existing electrical infrastructure.

What is the difference between a fan and a solar module?

Fan and solar module combinations allow daytime ventilation and air circulation anywhere the sun shines. They are great for greenhouses, kennels, barns and attics where AC power is not available. The solar module runs the fan at full power in full sun and at a slower speed in overcast weather.

How does a solar fan work?

The solar module runs the fan at full power in full sun and at a slower speed in overcast weather. Operation is automatic. When the sun shines on the solar.
