

# **Kyrgyzstan is a large energy storage power company**

## Overview

---

Does Kyrgyzstan have a long-term energy sector development strategy?

Kyrgyzstan does not have a long-term energy sector development strategy. The effective National Energy Program for 2008-2010 (NEP), with its integrated plan for fuel-energy complex development to 2025, was approved in 2008 and remains the government's main long-term policy document.

Could Kyrgyzstan attract massive energy and transport investments?

Given the right socio-political and policy conditions, the country could attract massive cross-regional energy and transport investments (World Bank, 2019). Kyrgyzstan's gross domestic product (GDP) per capita in 2020 was USD 1 176 (World Bank, 2021).

Does Kyrgyzstan have a transport sector?

Kyrgyzstan's transport sector accounts for one-third of the country's TFC, with increasing levels of vehicle ownership particularly in the last decade. The sector's annual energy savings potential is estimated at above 40%.

How much CO2 does Kyrgyzstan produce?

higher than the global average. The Kyrgyzstan energy sector contributes to roughly 60%, 9.1 MT of CO<sub>2</sub>, of its total GHG emissions, where the residential energy consumption and the production of heat & electricity account for over 70
