## Overview

---

Why is China building a 100 MW solar power plant in Kyrgyzstan?

Kemin, Kyrgyzstan — In a significant step toward enhancing Kyrgyzstan's energy infrastructure, China has begun construction of a 100 MW solar power plant in the city of Kemin, located in the Chuy Region. The project underscores Kyrgyzstan's commitment to sustainable energy development and environmental preservation.

What is Kyrgyzstan's solar project?

The project underscores Kyrgyzstan's commitment to sustainable energy development and environmental preservation. The solar plant, once operational, is expected to generate 155 million kWh of electricity annually, contributing to the country's energy needs while reducing reliance on fossil fuels.

Where is Kyrgyzstan building a new solar power plant?

Kyrgyzstan has launched the construction of a new solar power plant in the Kemin district of the Chui region, approximately 100 kilometers east of the capital, Bishkek. The plant will have a capacity of 100 MW and is expected to generate 155 million kWh of electricity annually.

Will Kyrgyzstan implement two solar power plant projects?

As part of the International Energy Investment Forum in Vienna, the Ministry of Energy and the Ministry of Economy and Commerce of Kyrgyzstan signed an agreement with the International Finance Corporation (IFC) on implementation of two solar power plant projects. The press service of the Ministry of Economy reported.
