

Large Energy Storage Management System

Overview

What are large-scale battery energy storage systems (BESS)?

Abstract: Large-scale battery energy storage systems (BESS) are rapidly gaining share in the electrical power system and are used for a variety of applications, including grid services and intraday trading. The energy management system (EMS) of BESS has a strong influence on the system efficiency and battery aging.

What is an energy storage management system?

An energy storage management system is a sophisticated software platform that integrates battery hardware with AI-driven algorithms to optimise energy storage operations. Unlike basic controllers, an energy storage management system enables predictive maintenance, grid service monetisation, and real-time monitoring with $\pm 0.5\%$ accuracy.
