

# Libya and the energy storage project in cooperation are

## Overview

---

How will the European Union support Libya's energy transition and climate resilience?

With a firm commitment to supporting Libya's energy transition and climate resilience efforts, the European Union has allocated funding to GIZ and UNDP to implement transformative projects to enhance Libya's capacity in renewable energy and energy efficiency and mitigate and adapt to climate change.

Does Libya need a strategic energy policy?

In summary, Libya needs to form strategic energy policies that factor in the country's energy security alongside climate change and energy transition. Affordability and availability of energy supplies remain key to the country.

Why does Libya need a solar power system?

Since most of Libya's hydropower is off-river, there is a need for substantial storage to support the solar-based energy system. Off-river Pumped Hydro impacts compared to on-river hydropower storage. In a mature and competitive market, solar PV has clear economic advantages over fossil fuels and hydropower.

Is Libya achieving sustainable economic sustainability goals?

The Libyan government is actively working towards achieving sustainable economic sustainability goals. The adoption of renewable energy will not only help reduce carbon dioxide (Salih, 2014). A rapid and radical shift towards a sustainable global energy system is currently taking place.
