

London 18W Solar Monitoring

Overview

Can London get more solar?

The Mayor's Solar Action Plan sets out how City Hall programmes are expected to more than double London's current solar energy capacity. But the Mayor thinks London can, and should, go further than this and wants to provide support to local government, businesses and others to install more solar in London.

How does Mypower's Solar Monitoring System work?

Mypower's fully interactive solar monitoring systems provide data on system status and output performance every 15 minutes. This will allow you to view the status of the system remotely and track actual production against predicted performance data of your agricultural, commercial or industrial solar power system.

What is the London solar opportunity map?

The London Solar Opportunity Map is based on the interpretation of LiDAR data (where laser technology is used to measure distances) collected and made available by the Environment Agency. It provides an initial estimate of the amount of electricity that could be generated from panels both on rooftops and at ground level.

Why do you need a Solar Monitoring Platform?

Once your own photovoltaic system is on the roof, it is important to ensure that it functions smoothly and performs optimally. With the Solar.web monitoring platform this is very easy. You are always up to date with your energy yield and consumption. You can save more money, because:
