

# **Luxembourg household solar lights**

## Overview

---

How has teleworking impacted solar energy demand in Luxembourg?

The high number of sunshine hours in spring coupled with an increase in the photovoltaic surface area over recent years have been key factors in reaching a historical peak of solar energy in Luxembourg in March and April 2020. In addition, teleworking during the weeks of lockdown had a positive influence on electricity demand, which declined.

What is Luxembourg's Energy Policy?

As part of an energy policy geared towards a sustainable, secure and competitive energy supply, this financial aid is aimed at improving the energy performance of single-family houses or apartments. Luxembourg wants to accelerate the timelines for renewable energies in order to reach around 25% clean energy by 2030 and 100% in the long term.

Will Luxembourg transition to climate neutrality?

The transition to climate neutrality seems to be making great strides. With 306.3 hours of sunshine in April, which is well above average, the exceptional weather was one of the reasons behind the historical peak of solar energy in Luxembourg.

Where can I find information about photovoltaics & financial support?

For more information about photovoltaics and financial support for individuals, please consult the website of Klima-Agence, the national body for the promotion of a sustainable energy transition. During lockdown, the electricity demand in Luxembourg declined by 28.1%, in particular in the banking sector.
