

# **Maldives container lithium iron phosphate battery**

## Overview

---

How much does a LiFePO4 battery weigh?

The company says its newest product uses 700-Ah lithium iron phosphate (LiFePO4) cells in a liquid-cooled 1,500 to 2,000-volt configuration that's good for nearly 16,000 charge cycles that all fits in half a normal shipping container. All in, the system weighs about 55 tons (50 tonnes).

Are LiFePO4 batteries safe?

While LiFePO4 doesn't have the same inherent risks of "venting" as do the much more common lithium-ion (Li-ion) batteries, Envision's energy storage unit features a pretty robust six-tiered suite of safety features.

Can LFP batteries be used in Bess containers?

TLS Offshore Containers International, a global leader in offshore containers and modular equipment, has recognized the potential of LFP batteries and incorporated them into their BESS containers.
