## Overview

---

What is energy storage system deployment in MENA?

Energy Storage System deployment in MENA Energy Storage Systems (ESS) play a critical role in the integration of VRE into the power grid, as these systems manage the intermittencies of renewable energy resources and mitigate potential power supply disruptions.

Which energy storage technology has the most installed capacity in MENA?

Pumped hydro storage (PHS) has the largest share of installed capacity in MENA at 55%, as compared to a global share of 90%. Pumped hydro storage is one of the oldest energy storage technologies, which explains its dominance in the global ESS market.

Why is Middle East energy launching a 49th consecutive year in Dubai?

“The continued organization of Middle East Energy for a 49th consecutive year in Dubai reflects international confidence in the emirate as a strategic centre for conferences and exhibitions, and reinforces its role in leading the global dialogue on energy security and sustainability,” stated Sheikh Ahmed.

Which energy storage solutions will be the leading energy storage solution in MENA?

Electrochemical storage (batteries) will be the leading energy storage solution in MENA in the short to medium terms, led by sodium-sulfur (NaS) and lithium-ion (Li-Ion) batteries.
