

Middle East generator container customization

Overview

Why should you choose a containerised generator?

Fire Detection Panels and Intruder Alarms: Enhanced safety and security. Our containerised generators are suitable for a wide range of applications, including: Super Silent: Super silent 65dBA at 1m for prime power running diesel and gas. Critical Backup Power: For MOD, NHS, and HMP sites, ensuring reliable performance in emergencies.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

What is a Tier 4 containerized generator?

Our Tier 4 containerized generators are high-powered —500 kW to 1250 kW— units packaged in 30-foot or 48-foot ISO containers.

Why should you choose a containerised engine?

Our containerised solutions are designed to provide optimal performance across various site conditions, ensuring excellent reliability for all your power generation needs. By maintaining highquality standards for both the engine and the complete containerised package, we guarantee superior performance and longevity.
