

Minsk base station UPS power supply installation

Overview

What are uninterruptible power supplies (UPS)?

Uninterruptible power supplies (UPS) are not a new technology but over recent years their application to the mining industry has increased in terms of volume and rated power. UPS installations come in various shapes and sizes that are specific to each application and the associated electrical installation.

What is the scope of activities for installing uninterrupted power supply (UPS)?

1.1. Scope of Activities This scope defines the minimum standards for installing Uninterrupted Power Supply (UPS). The UPS, Batteries, I/O Panel with integrated PDU, and all the internal power/control cabling will be provided and installed.

Are ups suitable for electrical installations at mine sites?

risks may be created by arcing, fire, fumes or acids/chemicals associated with the batteries. Not all UPS installations are suitable for connection to electrical installations at mine sites. Specialist consultants should be involved in the design of the installation to ensure the application is fit for purpose.

How to install ups?

Open the UPS doors and unscrew the metal straps mounted on the front cover of the UPS. 3.1.6. The UPS equipment will then be moved into position using scoots and pallet trucks. 3.1.7. The batteries and stand will be moved into the UPS room using pallet trucks 3.2. Installation Stage UPS 3.2.1. All parts are accessible from the front or top of UPS.
