

Mobile energy storage device control system

Overview

What is a mobile energy storage system?

A mobile energy storage system is composed of a mobile vehicle, battery system and power conversion system . Relying on its spatial-temporal flexibility, it can be moved to different charging stations to exchange energy with the power system.

What is a mobile battery energy storage system (MBESs)?

Based on BESSs, a mobile battery energy storage system (MBESS) integrates battery packs with an energy conversion system and a vehicle to provide pack-up resources [2] and reactive support [3] for disaster conditions, or to perform market arbitrage [4] in distribution networks.
