

# Mongolia Energy Storage New Energy

## Overview

---

Why is Inner Mongolia constructing a new energy storage power station?

[Photo/Xinhua] HOHHOT -- Inner Mongolia Energy Group has started constructing a large-scale new energy storage power station in the Ulan Buh Desert, the eighth-largest in China, to better harness new energy power for grid connection.

Why is energy conservation important in Mongolia?

Mongolia also recognises electricity as the main source driving economic development and addresses the need to generate and distribute more power in terms of greater volume, density, and reliability. The increase of energy demand puts pressure on the government to take energy conservation seriously.

What is Mongolia's Energy Policy?

Mongolia has abundant natural and mineral resources. To efficiently meet most of its daily energy needs these resources need to be properly developed and managed. Its energy policy aims to ensure access of its citizens to modern energy services developed on the basis of its important and high potential renewable energy sources.

What is the largest energy storage power station under construction?

Designed with a capacity of 605,000 kilowatts, the project is the largest single energy storage power station under construction in the country. The energy storage station can help send a stable supply of electricity from photovoltaic power facilities to the grid.
