

Moscow Communications 5G base station construction in 2025

Overview

Will Russia test 5G in 2025?

According to Russian news agency Tass, Russia expects to conduct pilot testing of 5G networks in 2025 using “home grown”/ locally built base stations. Russia’s Ministry of digital development, communications and mass media Maksut Shadayev said, “We expect a pilot test to begin in 2025 in cities with more than one million people.”.

Is Russia launching a 4G & 5G base station?

Russia is starting the production of 4G and 5G base stations that will use Russian-made software. This was announced on October 1 by Russian Prime Minister Mikhail Mishustin. We are now launching the creation of base stations with Russian software for 4G and 5G networks. Next year, we plan to establish mass production of such solutions.

When will 5G start in Russia?

"The active deployment of 5G networks at domestic base stations will begin in 2026 in large Russian cities," the minister said, noting that preparatory work to launch the networks will take place in 2025.

Will Ericsson build a 5G base station in Russia?

In December 2021, Kommersant, citing its sources, wrote that Ericsson is preparing for the process of localizing the production of 5G base stations in the Russian Federation. According to the publication, the Swedish company is considering options for partnership or creating its own site for the production of equipment.
